Seqrite Enterprise Mobility Management

Seqrite Enterprise Mobility Management is the security solution to monitor, manage, and secure employee's mobile device within the enterprise. Seqrite Enterprise Mobility Management works on the Client-Server architecture where the console (Hosted on Cloud) manages all the mobile devices. The client agents can be installed on almost all the flavors of Android and iOS mobile. Seqrite Enterprise Mobility Management client is having built-in antivirus, which keeps the devices safe from any virus attack.

To manage the mobile device, Seqrite Enterprise Mobility Management applies certain policies and configurations such as, app configuration, web security configuration, anti-theft, network data usage, fence configuration, etc.

Android Enterprise Enrollment using Android Management APIs empowers the admin with an extended range of device settings and extra policy controls to set up, configure, and deploy company owned devices.

Benefits of Seqrite Enterprise Mobility Management

- Secure and manage all Android devices.
- Secure data and resources, enhance user productivity, reduce costs, and maintain communications.
- Perform Seqrite Enterprise Mobility Management portal administration.
- Manage devices with policies and configurations.
- Monitor network data usage and Call/SMS.
- Manage apps on the device with app configuration.
- Restrict app usage and prevent misuse of the device with Seqrite Launcher or System Kiosk Mode.
- Monitor the device by applying fencing parameters such as time, location, and Wi-Fi.
- Generate customized reports.
- Troubleshoot any critical issue with remote device control.
- Android Enterprise Enrollment to have better control over corporate devices.

Prerequisites

- The device must be connected to the Internet via any network (Mobile data/Wi-Fi).

Conditional Access Control for Seqrite BYOD:

- Account with Seqrite ZTNA.
- Policies and SaaS application integration setup in Seqrite ZTNA.

Mobile Device Specifications

- Android OS version 6.0.1 onwards
- iOS 14 onwards
- Android 7 and above for Android Enterprise Enrollment
- Android 11 and above for Work Profile for Corporate device Enrollment

- Android 7 and above for Work Profile for Personal device Enrollment

Browser Requirements

Administrator Web Panel

- Google Chrome (latest versions)
- Firefox (latest versions)
- Microsoft Edge (latest versions)

What's New

- **Custom Apps through EMM console on AMA Enrolled Devices**
EMM now supports adding custom app for AMA enrolled devices from EMM console without any intervention from Google Play Store with same package ID for multiple tenants.
- **Spanish Language Version Introduced:** Seqrite EMM is now available in Spanish (Mexico), expanding accessibility and providing a localized experience for Spanish-speaking users.
- **Geo Fence Notification:** Admins now receive notification whenever a device enters and exits a designated geofence area. This ensures timely awareness, improved monitoring, and stronger control over location-based activities.

Bug Fixes

- Fixed issues preventing users from configuring workspace email accounts.
- Resolved issue where Seqrite EMM app failed to enroll via ADO.
- The user was unable to log in to the Workspace Email Agent configured through ZTNA.
