Overview

This document helps you, deploy OVA on the VirtualBox, and set up Seqrite Endpoint Protection server.

OVA (Open Virtualization Appliance) file contains a compressed version of a virtual machine. When you deploy an OVA file, the virtual machine is extracted and imported into the virtualization software installed on your computer.

The OVA build file is provided to address any of the following scenarios at the customer end.

- Ubuntu 22.04 LTS machine is not available.
- Only Windows machines are available.

This OVA will create an Ubuntu 22.04 LTS machine on top of the VirtualBox and then you can proceed through the configuration of the pre-installed EPP server.

OVA Details

- OVA File name: EPP_8.3_UBUNTU22.ova
- Oracle Virtual box version: 7.0.8
- RAM: 8 GB

Prerequisites

- Physical Windows Machine with RAM \geq 16 GB
- Windows 10 and above OR Windows server 2019 and above
- Disk space: 60 GB and above.
- CPU: 4 Core (x86-64) or above.
- The VT-x must be enabled in the physical machine's BIOS.
- Oracle Virtual Box 7.0.8
- EPP_8.3_UBUNTU22.ova build file.
- Keep the following details ready and handy.
 - Product Key
 - Static IP Address

- Gateway
- Subnetmask
- DNS

Note: For seamless working of OVA over virtual box, it is recommended to have only one hypervisor installed on the system. Other than the Oracle Virtual Box, ensure that no other hypervisor is installed on the system.

Please be advised that the images featured in this guide correspond to a previous release.

Step 1: Deploy OVA on VirtualBox

Follow these steps to deploy OVA on the VirtualBox.

1. Download and install Oracle VM VirtualBox on Windows machine.
2. Open the VirtualBox.
3. Go to **File > Import Appliance**.
4. In this step, choose a virtual appliance file to import. Click **Browse** and select **EPP_8.3_UBUNTU22.ova** file.
5. Click **Next** and follow the wizard.
6. Click **Import**.

When the Import is complete, VirtualBox creates VM with Ubuntu. On this, you will configure the pre-installed EPP 8.3 server.

7. Start the VM. The Network Error prompt appears.

8. Click **Change Network Settings**.

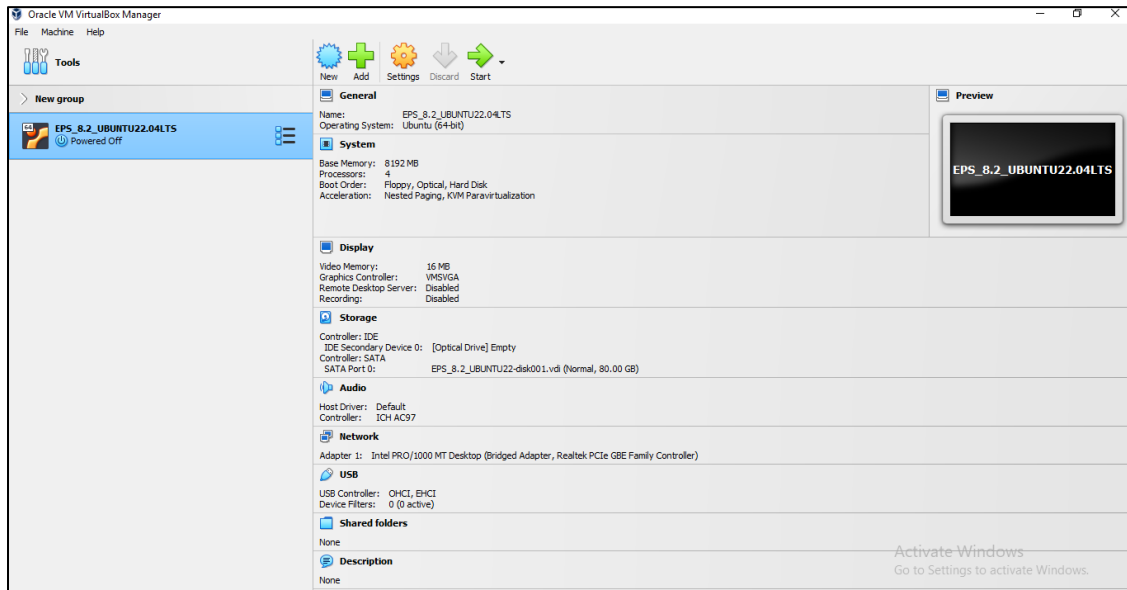

The error prompt disappears.

9. Go to **Settings > Network**. Click **Ok**.

10. Oracle VM VirtualBox Manager window appears.

OVA is deployed successfully on the VM.

11. Click **Start** icon to start the VM. The VM is ready for use.

Step 2: Configure EPP Server

1. On the VM, login with the given credentials.

Note: It is recommended to change the password after installing the EPP server.

2. Provide the following details one after another and hit [Enter].

- Static IP Address
- Subnetmask
- Gateway
- DNS

```
Welcome to OVA pre-installed product deployment wizard
This will guide you through rest of the configuration process
-----
Beginning configuration

Setting up IP configuration for EPP OVA deployment
Please provide IP address
[REDACTED]
Please provide subnet mask
[REDACTED]
Please provide gateway
[REDACTED]
Please wait while IP configuration is in progress
Please provide DNS IP
[REDACTED]
Please wait while we check for internet connectivity
Internet connection is successful DNS via [REDACTED] ..!

Checking for internet connectivity..
```

3. **Software License Agreement** appears. Read the License Agreement carefully. Installation and usage of Seqrite Endpoint Protection is subject to your formal acceptance of the Seqrite Endpoint Protection end-user license terms and conditions. To continue, hit [Enter] or press R key to read more.
4. **Terms & Conditions** appear. To continue, hit [Enter] or press R key to read more. To continue, type A and hit [Enter] to accept the terms and conditions; D option is to decline. If you decline, the installation process is stopped.

```
[A] Accept
[D] Decline

To continue, type A or D and hit [Enter]
A

Seqrite is a proprietary trade mark of Quick Heal. We update our policy periodically without any notice; kindly visit this page occasionally to stay informed about any changes in the policy.

To continue, hit [Enter] or [R] to Read More

I am giving consent to use my data for Product Activation and further updates of Seqrite Endpoint Protection.I have read and I agree with the terms of Privacy Policy.

[A] Accept
[D] Decline

To continue, type A or D and hit [Enter]
A

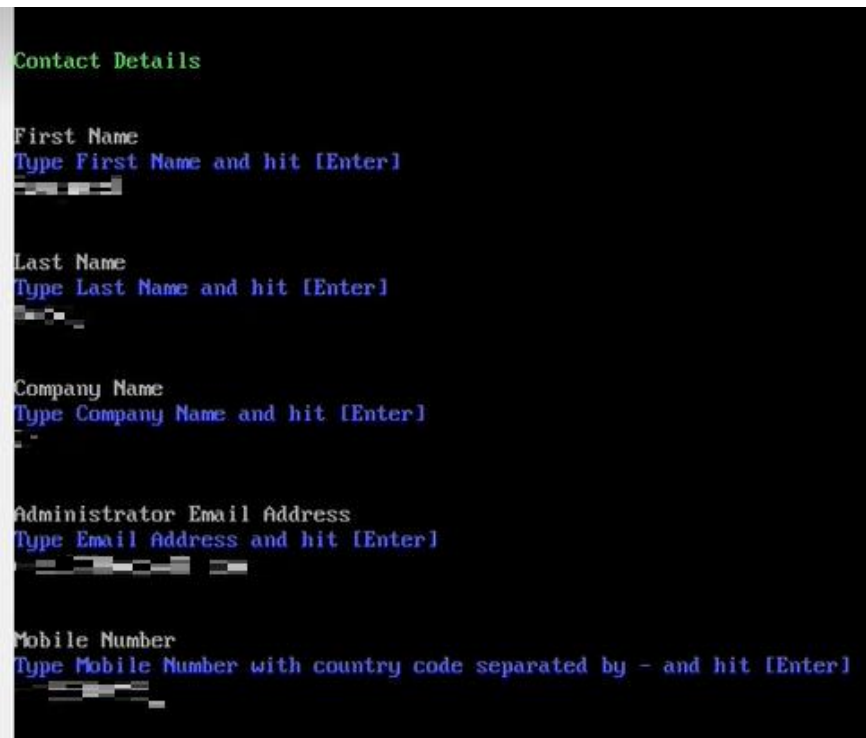

Please wait, configuring the system for user, which may take 5 to 6 minutes.
```

5. Wait till the system is configured for user. It might take 5 to 6 minutes.
6. The Proxy Settings screen appears. If you are using a proxy server to connect to the Internet, type 1 and hit enter.

If you want to continue without enabling Proxy Settings, type 2 and hit enter. The Proxy Setting information is used by EPP server for internet connectivity, activation and for downloading updates.

To enable and configure proxy settings:

- a. Type the IP address of the proxy server or domain name (For example, proxy.yourcompany.com) and hit [Enter].
 - b. Type the port number of the proxy server (For example: 80) and hit [Enter].
 - c. Type 1 to Authenticate to connect through the Proxy server. Type 2 to continue without authentication.
 - d. Type User Name.
 - e. The success message appears if the connection to the proxy server is successful.
7. The Customer Information screen appears. Enter the information step by step.

Note: The maximum length for the first name is 50 characters.

8. The Authentication screen appears. Create Seqrite Endpoint Protection administrator password to access the Web console and endpoint password to access the endpoint settings at the endpoint side.
 - a. Type in Administrator Email Address and hit [Enter] or you can continue with the existing Email address. To continue, hit [Enter].
 - b. Type in your password and hit [Enter]. Type password again to confirm the password and hit [Enter]. You cannot view the typed password.
 - c. You can provide client credentials. This is optional. Type 1 to specify client credentials and hit [Enter]. Type in client password and hit [Enter]. Type client password again to confirm the password and hit [Enter]. You cannot view the typed password.
 - d. This helps prevent unauthorized users from accessing the Web console and make changes in your settings or remove the endpoints.
 - e. Type 2 to continue without providing client credentials and hit [Enter].
9. The installation summary screen appears. Activation and Server Configuration data is displayed. Please note the EPP console URL.
 - a. Type **1** to save summary file and hit [Enter].
 - b. Type **2** to continue without saving and hit [Enter].

```
Verify the summary of Activation and Server Configuration.
Please note the EPP login URL.

Installation Type      :Single Node Installation
Installation Path      :/opt/Seqrite_EndPoint_Security
Login URL              :https://10.10.8.116/epp/login

[1] Save Summary File
[2] Continue without saving

To continue, type 1 or 2 and hit [Enter] to continue
1

Triggering Preconfig and Tenant On-Boarding
Preconfig and Tenant On-Boarding is successful...!

Installing Default Linux Client
```

10. The installation process starts. Tenant onboarding starts.

11. It prompts you to change the password.

```
After OVA configuration, you must change the epp user password.

New Password
Type Password and hit [Enter] to continue

Confirm Password
Type Confirm Password and hit [Enter] to continue
```

12. After changing the password, you need to log in again.

```
After OVA configuration, you must change the epp user password.

New Password
Type Password and hit [Enter] to continue

Confirm Password
Type Confirm Password and hit [Enter] to continue

[Error] The password and confirmation password do not match.

Password
Type Password and hit [Enter] to continue

Confirm Password
Type Confirm Password and hit [Enter] to continue

The Password has been changed successfully.

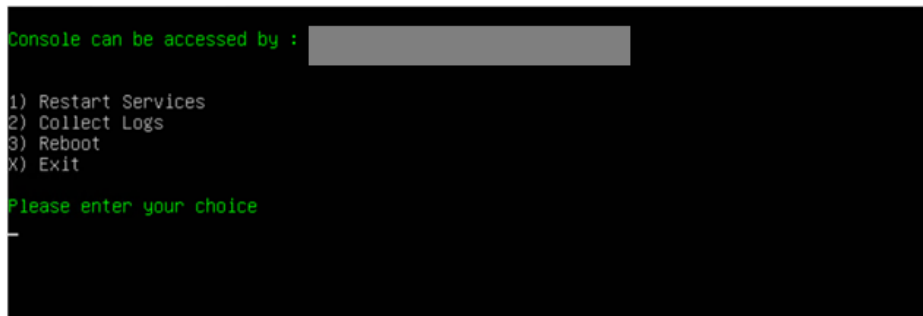

Please re-login to apply changes.
To exit, hit [Enter]
```

13. To continue:

- a. Type **Y** to continue using the system and hit [Enter].
- b. Type **N** to log out and hit [Enter].

```
Configuration is now complete and system is ready for use...!!
Console can be accessed by : [redacted]/eps/login
Please Enter Y to continue using the system or N to logout
_
```

14. If you enter **Y**, the following screen appears.

```
Console can be accessed by :   
  
1) Restart Services  
2) Collect Logs  
3) Reboot  
X) Exit  
  
Please enter your choice  
-
```

15. Enter your choice and hit [Enter].

Step 3: Log on to EPP Server

1. Paste the console access URL in any browser. Example: <https://<provided IP Address>/login/eps>.

Supported Web Browsers:

- Google Chrome 62, 63, 64 or 65
- Mozilla Firefox 56, 57, 58, 59, 62, 64 or 65
- Microsoft Edge.

2. Provide the credentials.

Seqrite Endpoint Protection console is ready to use.

Exiting the Setup

You can exit from the setup process by pressing **Control C** keys.

Confirmation message appears. Again, press Control C keys to exit the setup.
