Overview

The document provides system requirements across multiple organizational sites, enabling users to understand centralized endpoint management through a Central Console/GUI.

The following sections provide detailed system requirements for Seqrite Endpoint Protection (EPP) and Endpoint Detection Response (EDR) procedures for both the Endpoint Protection Control Center and Site Servers.

Audience

This guide is beneficial for Seqrite administrators, SOC managers, and Seqrite support customer/partner system administrators deploying EPP 8.3 with EDR edition.

System Requirements for Endpoint Protection Server
