Introducing Seqrite Data Privacy

Seqrite Data Privacy is a data privacy management platform that empowers your organization to manage data privacy requirements across locations. The platform provides the ability to find sensitive and critical data spread across your organization's data landscape. It enables you to classify and label this data to suit your business and privacy compliance requirements. Seqrite Data Privacy lets you manage the subject profiles and subject rights requests.

Starting your data privacy journey with Seqrite Data Privacy:

- Get visibility into the different data and data sources present across your organization's data and entities perimeter.
- Auto-classify discovered data using pre-built or custom classifiers.
- Channel multi-level workflows to ensure appropriate handling of data across the organization.

What's New

Seqrite Data Privacy 2.2 includes the following new feature(s):

Data-Source Connectors

- **IBM DB/2 Integration:** Added support for connecting and classifying data from IBM DB/2 databases.
- **SAP Sybase ASE Integration:** Added support for connecting and classifying data from SAP Sybase ASE.
- **SharePoint Integration:** Added support for connecting and classifying data from SharePoint.
- **PostgreSQL Integration:** Added support for connecting and classifying data from PostgreSQL.

Report Download Framework

- **Asynchronous Report Requests:** Introduced functionality for submitting and processing report requests asynchronously.
- **Report Download Status Page:** Added a dedicated page to track the status of report downloads and provide progress updates.

Profile Stitching

Stitched Profile Exploration: Enabled exploration and visualization of stitched profiles within the data.

IdP Integration (Cloud)

Added support for Identity Provider (IdP) integration in cloud environments, enabling its use for configuring tags in datasource settings.

Symantec DLP Connector

Implemented integration with Symantec Data Loss Prevention (DLP) for enhanced data protection and monitoring. This feature enables seamless interaction with Symantec DLP solutions to enforce data security policies and manage data loss risks effectively.

- **MIP Configuration:** Implemented configuration capabilities for Microsoft Information Protection (MIP).
- **Mapping Classifier with Label:** Enabled mapping of classifiers to labels for enhanced data classification.
- **Adding Labels as File Metadata:** Implemented functionality to ensure that appropriate labels are applied to classified files on endpoints.

Full On-Premises Support

Tenant Onboarding: Added comprehensive support for onboarding new tenants within on-premises environments, facilitating streamlined setup and configuration.

Guardrails

Improved management of banner displays and popups for better user notification and interaction control. Monitor application components (e.g., database, HDFS, Redis, ActiveMQ) for failure conditions and inform users promptly of any issues.

Technical Support

Seqrite provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
