About Seqrite Centralized Security Management

With cyber threats constantly evolving, getting smarter, and more sophisticated, it's time you get holistic visibility of security posture in one place to mitigate risks before it becomes a disaster.

Seqrite Centralized Security Management is a cloud-based platform that will enable coordination between different security layers, integrate cybersecurity silos into a single source of truth, and ensure your point products communicate with each other to consolidate alerts, identify risks, and convert the data into intelligence.

Seqrite Centralized Security Management will enable your business to prevent real-time malware breaches, make insight-driven decisions, and accelerate vital security functions quickly and effectively with just a few clicks.

Supported Seqrite Products

With Seqrite Centralized Security Management 2.7.4, you can manage the following Seqrite products:

- Seqrite Endpoint Protection (Cloud) with DLP as add-on
- Seqrite XDR
- Seqrite EDR Cloud
- Seqrite Enterprise Mobility Management/Seqrite Workspace
- Seqrite Data Privacy
- Seqrite ZTNA

What's New

Product Access Provision for the Users

Seqrite Centralized Security Management 2.7.4 introduces the following feature:

Product Access Provision for Users: The latest update now enables the User Creation for the CSM Administrators to specify which products these users can have access to, thereby providing more granular separation of duties to the personnel.

Technical Support

SEQRITE provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
