Introducing Seqrite Data Privacy

Seqrite Data Privacy solution helps organizations discover, locate, classify, and label sensitive data throughout their enterprise resources, ensuring adherence to privacy laws corresponding to different geographical areas. The solution allows privacy teams to shift through various applications, databases, and other IT sources; creating profiles to keep track of personal and confidential customer data and managing workflows for requests of access or modification of such data.

Begin your journey to safeguard the sensitive data with Seqrite Data Privacy solution.

- Get visibility into the different data and data sources present across your organization's data and entities perimeter.
- Auto-classify discovered data using pre-built or custom classifiers.
- Channel multi-level workflows to ensure appropriate handling of data across the organization.

What's New

Seqrite Data Privacy 2.2.2 includes the following new features.

Assessment Manager

The new **Assessment Manager** is designed to streamline the creation, management, and review of assessments within your organization. This module provides an intuitive framework for building reusable questionnaires, gathering feedback, and ensuring a thorough review and approval process.

Key Features:

1. Template Management

- Create and manage reusable questionnaire templates with a variety of question types, allowing for flexible and standardized assessments across your organization.

2. Assessment Lifecycle Management

- Build assessments based on predefined templates and assign specific roles to participants, including:

- Owner: Manages the assessment creation and distribution.
- Approver: Reviews responses and provides final approval.
- Respondents: Answer the assessment questions.
- Participants: Engage in the assessment process, providing insights where required.

3. Respondent Interaction

- Respondents can easily submit their answers to the assessments, which are then passed through the review cycle.

4. Review & Approval Process

Approvers can:

- Provide a verdict on responses.
- Conduct risk analysis and flag potential issues.
- Request answer revisions or leave comments for clarification.
- Grant final approval once responses meet expectations.

5. Notifications & Reminders

- Automated notifications and reminders ensure that all parties involved stay informed and on track throughout the assessment process.

This module is designed to simplify assessment workflows, improve collaboration, and enhance decision-making through clear roles, structured feedback, and automated communication.

Technical Support

Seqrite provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
