### **Introducing Seqrite ZTNA**

Seqrite ZTNA from Seqrite helps organizations enforce the zero-trust user access paradigm, where an organization by default does not trust any employee, contractor, or vendor staff with access to its systems and applications whether from within or outside the corporate network. It also replaces the complexity of VPN management.

Starting your zero-trust journey with Seqrite ZTNA:

- Create a zero-trust ecosystem with controlled set of users and applications.
- Deploy an agent-less solution and expand as per security appetite.
- Plug in your security requirements and deploy Segrite ZTNA within minutes.
- Integrate Segrite ZTNA with your existing IT infrastructure for identity management.

### What's New

Segrite ZTNA 2.3.1 includes the following new features.

#### **Enhanced User Portal Access Control**

Improved security by ensuring that users can only access their designated tenant user portals. This enhancement prevents unauthorized access to other tenant user portals, ensuring a more secure user experience.

#### Two-Factor Authentication (2FA) Support

Introduced Two-Factor Authentication (2FA) support in the User Portal to enhance account security with an additional verification step.

#### **Loader During Network Application Connection**

Added a "wait" popup/loader on the User Portal during network application. This enhancement provides users with a visual indicator that the system is establishing a connection, signalling them to wait until the process is complete.

#### Report Terminology Update

**Renamed "Reports" to "Policy Insight":** The term "Reports" has been updated to "Policy Insight" across the following areas:

- Audit Trail Logs
- Exports
- Left Navigation Menu

#### **Device Posture Re-evaluation**

Enhanced the re-evaluation process for device posture to ensure more accurate and timely assessments.

## **Technical Support**

Seqrite provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
