## About Seqrite Centralized Security Management

---

With cyber threats constantly evolving, getting smarter, and more sophisticated, it's time you get holistic visibility of security posture in one place to mitigate risks before it becomes a disaster.

**Seqrite Centralized Security Management** is a cloud-based platform that will enable coordination between different security layers, integrate cybersecurity silos into a single source of truth, and ensure your point products communicate with each other to consolidate alerts, identify risks, and convert the data into intelligence.

**Seqrite Centralized Security Management** will enable your business to prevent real-time malware breaches, make insight-driven decisions, and accelerate vital security functions quickly and effectively with just a few clicks.

---

## Supported Seqrite Products

---

With Seqrite Centralized Security Management 2.7.5, you can manage the following Seqrite products:

- Seqrite Endpoint Protection (Cloud) with DLP as add-on
- Seqrite XDR
- Seqrite EDR Cloud
- Seqrite Enterprise Mobility Management/Seqrite Workspace
- Seqrite Data Privacy
- Seqrite ZTNA

# What's New

---

## Centralized Endpoint Logs Collection

Seqrite Centralized Security Management 2.7.5 introduces a new feature **Centralized Endpoint Logs Collection** designed to streamline the process of collecting product logs from multiple endpoints.

The feature has the following key capabilities:

- **Centralized Log Collection:** Administrators can now collect logs from a centralized location within the CSM, simplifying the management and troubleshooting process across products.
- **Endpoint and Product Selection:** Flexibility to choose specific endpoints and products for log collection. A maximum of 5 endpoints can be processed simultaneously to ensure optimal system performance.
- **Efficient Log Management:** Logs for each endpoint are compressed into a single zip file for easy download and storage.
- **Time-Bound Storage:** Collected logs are stored securely on the server for a maximum duration of 1 week, ensuring compliance with data retention policies.

This new feature helps the operational efficiency to be seamless for the administrators who manage distributed product environments.

## Filter and Delete Inactive Devices

- **Filter Inactive Devices:** Easily identify devices that have been inactive for more than 7/15/30 and so on days using the new filtering option.
- **Bulk Deletion:** Select and delete these inactive devices in bulk, streamlining device management and keeping the system optimized.

## Devices Grid View User Experience Enhancement

Users can now select and adjust the columns in the Devices Grid, tailoring the table view to match their specific preferences

## Dashboard View Based on User Role and Product Selection

Per user role, the system will display the dashboard corresponding to the selected product/s for that user. This improvement ensures users have a streamlined and relevant view, eliminating unnecessary distractions and enhancing productivity within the platform.

## Technical Support

---

SEQRITE provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
