Contents

Seqrite XDR

Seqrite XDR, Extended detection and Incident Response Solutions, helps you monitor your network for any signs of active cyber threats and respond appropriately. Seqrite XDR facilitates proactive threat detection, investigation, and effective remediation to modern day cyber threats. Seqrite XDR supports threat hunting, system and custom alerts, detailed alert analysis and high-level reports that give you a bird's eye view of the organization's security posture. Seqrite XDR brings stability, reliability, security, and an intuitive UI.

Features released in Seqrite XDR 2.3.1.2

Domain Whitelisting

Seqrite XDR 2.3.1.2 introduces a new functionality to whitelist specific and selected domains associated with an organization. This enhancement ensures that alerts generated for these domains and subdomains will get whitelisted.

Quarantined Files

Introduced a new "Quarantined Files" option in the left navigation panel under the Reports section for enhanced accessibility. Upon selecting this option, users can view a comprehensive list of files quarantined by the XDR system.

Key Features:

- A dedicated page to display all quarantined files.

- An **Export** button at the top of the page to allow users to save a PDF list of quarantined files for further analysis.

Notification Email Template Enhancement

A dedicated email template is now available for the autorun playbook, designed to improve user readability.

Usage Information

- Microsoft has deprecated support for SHA-1 and recommends using only SHA-2 signed certificates for its OS updates. Accordingly, the SHA-1 certificates that Seqrite was using expired on 4th June 2021, so the following operating systems are not supported unless the appropriate patches are applied.

    - Windows Vista – Not supported

    - Windows Server 2008(below R2) – Not supported

    - Windows 7. To continue using this operating system without any issues, please apply "KB4474419" and "KB4490628" service packs.

    - Windows Server 2008 R2. To continue using this operating system without any issues, please apply "KB4474419" and "KB4490628" service packs.

- All process events whose process create event is older than 30 days, return a "No data found" error in response and Alerts are not generated for these processes even though corresponding rule may exist.

Technical Support

Seqrite provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
