Seqrite XDR

Seqrite XDR, Extended detection and Incident Response Solutions, helps you monitor your network for any signs of active cyber threats and respond appropriately. This facilitates proactive threat detection, investigation, and effective remediation to modern day cyber threats. The product supports threat hunting, system and custom alerts, detailed alert analysis and high-level reports that give you a bird's eye view of the organization's security posture. Seqrite XDR brings stability, reliability, security, and an intuitive UI.

Features released in Seqrite XDR 2.3.1.3

Enhanced Activity Visibility for Specific Time Intervals for the Selected Endpoints

Seqrite XDR 2.3.1.3 introduces a new functionality that empowers users to view and investigate all activities performed on a specific endpoint within a chosen time span. This enhancement addresses the need for greater visibility and streamlined investigation capabilities.

Key Benefits:

- Users can now select a specific endpoint and define a time range to access a detailed activity log.
- Simplifies the investigation process by providing all logs and alerts around a specific endpoint, such as a high-priority alert generated at a specific time.
- Enables rapid identification of related activities that occurred within the defined timeframe, improving response time and accuracy.

Usage Information

- Microsoft has deprecated support for SHA-1 and recommends using only SHA-2 signed certificates for its OS updates. Accordingly, the SHA-1 certificates that Seqrite was using expired on 4th June 2021, so the following operating systems are not supported unless the appropriate patches are applied.
 - Windows Vista - Not supported
 - Windows Server 2008(below R2) - Not supported
 - Windows 8. To continue using this operating system without any issues, please apply "[KB4474419](#)" and "[KB4490628](#)" service packs.
 - Windows Server 2008 R2. To continue using this operating system without any issues, please apply "[KB4474419](#)" and "[KB4490628](#)" service packs.
- All process events whose process create event is older than 30 days, return a "No data found" error in response and Alerts are not generated for these processes even though corresponding rule may exist.

Technical Support

Seqrite provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
