### Segrite XDR

Seqrite XDR, Extended detection and Incident Response Solutions, helps you monitor your network for any signs of active cyber threats and respond appropriately. This facilitates proactive threat detection, investigation, and effective remediation to modern day cyber threats. The product supports threat hunting, system and custom alerts, detailed alert analysis and high-level reports that give you a bird's eye view of the organization's security posture. Segrite XDR brings stability, reliability, security, and an intuitive UI.

#### Features released in Segrite XDR 2.3.1.4

# Feature Update: File Upload and Processing Enhancements in Threat Hunting Section

Seqrite XDR 2.3.1.4 brings significant enhancements to the Threat Hunting section, focused on improving usability and streamlining workflows. Users can now upload a list of up to 100 IOCs using a CSV file, enabling searches across historical data stored in the XDR backend to identify potential threats. These updates simplify file handling, ensure compliance with data retention policies, and enhance investigative capabilities for more effective threat detection.

#### Enhancement in Endpoint Activity- Threat Hunting Page

With this improvement, the users can now choose the custom dates and time using the additional filter provided in the Threat Hunting page.

# **Usage Information**

- Microsoft has deprecated support for SHA-1 and recommends using only SHA-2 signed certificates for its OS updates. Accordingly, the SHA-1 certificates that Seqrite was using expired on 4th June 2021, so the following operating systems are not supported unless the appropriate patches are applied.
  - Windows Vista Not supported
  - Windows Server 2008(below R2) Not supported
  - Windows 8. To continue using this operating system without any issues, please apply "KB4474419" and "KB4490628" service packs.
  - Windows Server 2008 R2. To continue using this operating system without any issues, please apply "KB4474419" and "KB4490628" service packs.
- All process events whose process create event is older than 30 days, return a "No data found" error in response and Alerts are not generated for these processes even though corresponding rule may exist.

# **Technical Support**

Seqrite provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
