About Seqrite Centralized Security Management

With cyber threats constantly evolving, getting smarter, and more sophisticated, it's time you get holistic visibility of security posture in one place to mitigate risks before it becomes a disaster.

Seqrite Centralized Security Management is a cloud-based platform that will enable coordination between different security layers, integrate cybersecurity silos into a single source of truth, and ensure your point products communicate with each other to consolidate alerts, identify risks, and convert the data into intelligence.

Seqrite Centralized Security Management will enable your business to prevent real-time malware breaches, make insight-driven decisions, and accelerate vital security functions quickly and effectively with just a few clicks.

Supported Seqrite Products

With Seqrite Centralized Security Management 2.7.5, you can manage the following Seqrite products:

- Seqrite Endpoint Protection (Cloud) with DLP as add-on
- Seqrite XDR
- Seqrite EDR Cloud
- Seqrite Enterprise Mobility Management/Seqrite Workspace
- Seqrite Data Privacy
- Seqrite ZTNA

What's New

Global Settings

Seqrite Centralized Security Management 2.7.5 introduces a new feature enhancement in **Global Settings** where the users can choose the Auto Delete period for the disconnected devices.

User Experience Enhancements

- **Online Devices:** In the Devices section, upon selecting a Device Name, the right pane will display if the products installed (Example- XDR) are online with an indicator. If the device status is disconnected, the product status will be 'offline' by default.

Technical Support

SEQRITE provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
