# What's New

---

Seqrite Data Privacy 2.3.2 includes the following new features and enhancements.

## New Darwinbox Connector

Integrated Darwinbox as a new connector for seamless data ingestion.

## ETA for In-Progress Scans

Estimated time of arrival (ETA) now visible for ongoing scans across multiple data sources including databases, cloud storage, and collaboration platforms.

## Scan History & Object Count Enhancements

Users can view scan history per datasource with object count units tailored to the source type (e.g., rows for RDBMS, files for file systems, chats for Teams, mails for email sources).

## Device Grouping & Scheduling

Users can create endpoint groups and define scan schedules for controlled and efficient scanning.

## Improved File Search Capabilities

Enhanced search functionality for file-based datasources for faster and more accurate results.

## Proxy Support for Full On-Prem Setup

Proxy configuration enabled for full on-prem instances, including agent installation and classification through proxy.

## New Default Classifiers

Added several new predefined classifiers tailored to the Indian context.

## Extended File Format Support

Added support for scanning and classification of .ppt and .pptx files.

## Technical Support

---

Seqrite provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
