Doc Version	Date	Comment
1.0	16 Jan 2026	Seqrite Endpoint Protection Cloud 6.4 Spanish Released

What's New

With this release, the following features are added to EPP Cloud 6.4 Spanish Localization Support:

Spanish Language Support

Seqrite Endpoint Protection Cloud now supports Spanish. Users can enable Spanish by selecting it as the primary language in Seqrite Centralized Security Management.

For English tenants, existing endpoints will continue to display in English. To convert endpoints to Spanish, the admin must first change the language setting in the CSM portal. Endpoints must then be reinstalled from the EPP portal or upgraded to a higher AV client version to reflect the new language.
