## What's New

---

Seqrite Data Privacy includes the following enhancements in 2.3.6 release:

### Single Sign On (SSO) Support for SAML Based Providers (via Keycloak)

Seqrite Data Privacy now integrates with Single Sign-On (SSO) via Keycloak, allowing users to log in using their organization's domain credentials.

### Assessment - Risk Management - Support for 3x3 Matrix

- Assessment risk matrix has now changed from 4X4 to 3X3. This makes the risk evaluation process faster and less complex for end users.
- With only three risk outcomes (High, Moderate and Low), stakeholders can quickly identify and prioritize risks without ambiguity.

### Co-Branding Support: Custom Logo on Login & Console Screens

Seqrite Data Privacy now supports displaying an organization's logo in the following areas:

- **SSO Login Page:** The organization's logo is displayed alongside the Seqrite logo on the single sign-on login screen.
- **Application Header:** The organization's logo is shown in the console header across all pages.

## Technical Support

---

Seqrite provides extensive technical support for its users. In case you face any technical issue, you can contact our Technical Support center using the options available at the following URL:
