User Management and Attribute Mapping UI for ZTNA	2

What's New?

The following enhancements are part of the Seqrite Zero Trust V2.5.7 release:

User Management and Attribute Mapping UI for ZTNA

- **Overview**

Introduced a new interface in the ZTNA Console that allows administrators to directly manage and synchronize users. This is particularly beneficial for organizations using O365/Azure AD that do not have a direct identifier to sync with local AD infrastructure.

- **Key Enhancements**

- **Attribute Mapping:** New UI for mapping user attributes, ensuring seamless authentication for O365 email users using MS AD IDP. Administrators can now manually map new joining users and remove exit users directly from the ZTNA portal end users.
- **User Exclusion for Device Posture:** Added the ability to exclude specific users from device posture validation through the console.
